The Premium HDMI® Cable Certification Program

HDMI Licensing Administrator, Inc.
2020
The Premium High Speed HDMI® Cable supports 4K video with a rigorous compliance test specification and certification requirement specifically designed to help cable manufacturing achieve 4K@60Hz performance while eliminating interference from EMI emissions.

The Premium HDMI Cable Certification® Program assures consumers and commercial integrators that cables remain in compliance with an authentication and verification process throughout a product lifecycle.
Almost 100% of new TVs shipping are enabled with HDMI® technology.

Global 4K TV shipments continue as the dominate screen resolution.

Enhanced 4K video content distribution continues to grow.

Distribution includes streaming services, cable, satellite and IPTV set-top box installations.

Consumer and commercial AV sectors need to rely on well-performing installations to reduce product returns and service calls.
The Premium HDMI® Cable Certification Program

• Administered by the official agent for the HDMI specifications

• Requires every length of every model line to be tested

• Requires each cable to be tested at an official HDMI Authorized Test Center

• Requires authentication and verification via a proprietary anti-counterfeiting label on each product

• Requires continuing compliance with audit tests of in-market cables throughout the life of the product, and failing cables are removed from the label ordering system

• Uses a proprietary 2-level commercial grade HDMI Cable Certification mobile scanning app available for Android and Apple devices
The Premium Cable Compliance Test Specification

- Adds on to previous test specifications to ensure ultra-reliable connectivity for feature-rich 4K@60Hz/UltraHD content
- Tests are specifically designed to support 18Gbps bandwidth
- Expanded tests replicate actual use of 4K@60Hz resolution and frame rates and ensures delivery of a full range of advanced HDMI feature set
- Additional EMI test ensures no signal interference to wireless devices, important since ports are adjacent to Wi-Fi streaming plug-ins and other wireless devices
How to Identify a Premium High Speed HDMI® Cable

- The Premium High Speed HDMI® Cable Name on package
- The Premium High Speed HDMI® Cable Certification Label on all packages
- The Premium HDMI® Cable Logo printed on the label
- QR code + holographic image can only be scanned by HDMI Cable Certification app
- The Premium High Speed HDMI® Cable name printed on the cable jacket (optional)
